WHOLESALE CATALOGUE

OF

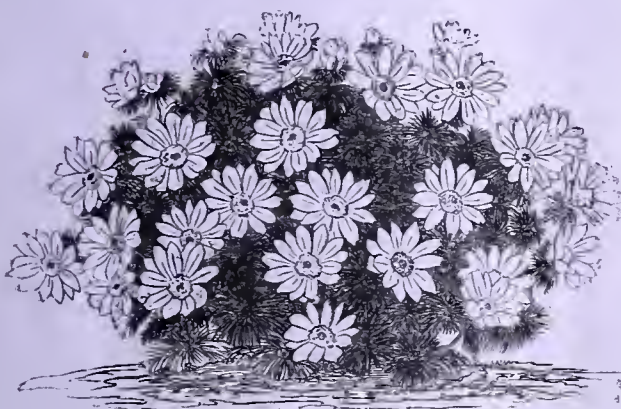

FLOWERROOTS, ETC.,

OFFERED BY

E. H. KRELAGE AND SON.

HAARLEM

(HOLLAND).

ADONIS VERNALIS

AMERICAN EDITION.

General Agent:

Mr. C. RAOUX, N^o. 35, Maiden Lane, New-York.

LILIES OF THE VALLEY.

E. H. KRELAGE AND SON have the pleasure to inform their customers that their stock of strong three years old *Convallaria Chumbs* — is unusually fine this season, so that they will be able to supply early orders with a superior article. — It is sufficiently known that *Convallaria chumbs* of inferior age and quality can be bought at a proportional low price — but that the real first strong quality is very scarce and usually insufficient for the demand.

NARCISSUS DUBIUS. (TOTUS ALBUS).

Price pr 12. 1/6 pr 100 12/6.

(the price quoted at pag. 15 of the Cat. is wrong).

NEW OR RARE TUBERCULOUS PLANTS.

E. H. KRELAGE AND SON will be happy to receive offers of new introduced fine flowering or ornamental leaved bulbous and tuberculous plants, fine seedlings or good old plants which have become scarce, either in smaller or larger quantities or by edition and are willing to exchange them or to buy them at acceptable conditions, if they can made use of such plants.

AGRICULTURAL-GARDEN AND FLOWER SEEDS.

Of every description. For next season catalogues will be published in due time.

DRIED AND CONSERVED VEGETABLES.

Extra fine collection of the best Dutch manufactories — German and Dutch Catalogues ready.

EVERLASTING AND OTHER DRIED FLOWERS AND GRASSES, BOUQUETS, ETC.

Complete collection. — Dutch Catalogues ready.

PLATES FOR TESTING SEEDS.

A new invention — Dutch and German illustrated Catalogues ready.

STRAWBERRY CRINOLINES.

A new methode for preserving Strawberry fruits. Dutch, German and French illustrated prospectus ready.

EVERY ARTICLE BELONGING TO THE HORTICULTURAL OR SEED-TRADE.

Catalogues will be published. Other informations are given by correspondence.

VISITORS TO THE ESTABLISHMENT.

146 — 150 Kleine Houtweg, Haarlem (Holland).

E. H. KRELAGE AND SON shall be most happy to see their principal establishment 146 — 150 Kleine Houtweg visited by horticulturists and amators. Every one before visiting the Gardens, requested, to call at the office, and to enter his name in the book which will be presented to him. The most proper time to visit the Gardens is from 10 to 12 before noon, from 2 to 4 in the after noon and in summer from 6—8 in the evening.

Horticultural and Seed-Establishment at HAARLEM in HOLLAND.

15 May.

1871—1872.

N^o 83.

her prices and medals on one hundred different dutch and foreign exhibitions.

CONDITIONS OF SALE.

The prices quoted in this list are in English Current, Pounds Sterling, fornet cash at Haarlem. The railway carriage from Haarlem to Amsterdam or Rotterdam, freight and insurance, shipping charges, etc. there and to the destination must be paid by the purchaser.

Packing, cases and materials are charged at the cost price.

Packing will be particularly attended to, experienced hands being employed for that purpose, notwithstanding should any damage or loss occur to the goods in transit, the purchaser must bear it.

All orders to be sent through Mr. **C. Raoux**, N^o. 35 Maiden Lane, New-York, with full directions as to time of shipment, and whether to be sent per steamer or sailing vessel. One half of the amount payable, in advance with the order, the balance on arrival of the goods in America, payable to Mr. **Raoux**, sole Agent of E. H. K. & S.

At the prices, quoted per 1000, E. H. K. & S. supply not less than 250, at the prices per 100 not less than 25, at the prices per 12 not less than three; so at prices per 10000 are supplied not less than 2500, at prices p. 100000 not less than 25000.

Single specimen or couples, as well as such articles which are not found in this list, are calculated at the prices of the retail-catalogue (with usual discount).

On every 25 pieces of the same sort one is given without charge, so four on every hundred.

The selection of sorts in the collections is made by E. H. K. & S.

As annually a great number of Catalogues is published, it can be useful in giving orders to state the number of the Catalogue, from which the selection has been made.

FOR THE EUROPEAN TRADE annual complete Catalogues, (wholesale and retail) are published in the Dutch, German, English and French languages.

English, French, German and Dutch CORRESPONDENCE.

TRAVELLERS. The Establishment has no travellers, every one is prevented against persons who pretend to be travellers for the firm of E. H. KRELAGE & SON.

E. H. KRELAGE & SON's Counting house, the Magazines and the Wintergarden are situated at the Kleine Houtweg, N^o. 146—150. (Haarlem) — The Nursery Grounds a „Bloemhof", Kleine Houtweg (Haarlem), — at „Sieraad van Flora", Wagenweg (Haarlem), — at „Bloemhof", Zijlweg (Overveen), — at „Bloemhof", Binnenweg (Heemstede).

PROPRIETOR AND DIRECTOR of the Establishment is Mr. J. H. KRELAGE knight of the Imperial order of St. Anna third class of Russia, and of the order of the Oak Crown of Luxemburg, President, Committee member, honorary member, correspondent or effective member of a great number of horticultural, agricultural, technic and scientific societies.

HYACINTHS.

The Hyacinths can be sent out from 1 August to 1 November,

SINGLE HYACINTHUS.

All the single hyacinths are very proper for forcing, those marked ** are the earliest, † the late sorts.

aa are flowers for exhibitions, *a* very fine and superior sorts, *b* good flowers, *c* flowers of no great value.

Single red.

DOUBLE HYACINTHS.

This rubric can be separated in the following sections viz: half-double, double, half-full, and full, according to the number of petals. The half-double have often several single bells. Though there are many good double flowers, blooming very early, it is a general rule that the most full flowers are the latest. The most early are marked **, the early sorts with *, these two series succeed very good and easy in forcing. The late sorts, which must be forced slowly and with care, are marked † and the latest sorts forcing very difficult or not at all, with ††.

aa are superior flowers for exhibitions, *a* very fine sorts, *b* good flowers, *c* flowers of no great value.

TULIPS.

Of the Tulips the most early varieties are distinguished by **, the early by *, a † indicates those, which must be forced slowly and with care. The sorts without any sign are, in general, only adapted for the open border; however by exception in the middle of winter the latest varieties of Tulips can be had in bloom, if forced with much care and patience.

Our collection is one of the most complete, it contains more than 2000 varieties; for more particularities, we refer to our catalogue of Tulips (n° 60), which will be sent on application and on the prices of which a discount of 20 per hundred is allowed to the trade.

LILIUM.

Our assortment of Lilium consists in nearly 300 sorts and is perhaps the most complete trade collection. We have a good stock of the leading novelties of this genus viz: = *Washingtonianum*, *Humboldtianum*, *puberulum*, *tigrinum flore pleno*, *Thunbergianum flore pleno* and the new varieties of *auratum*, *speciosum*, *Thunbergianum* etc.; these will be noted in our list of new and rare bulbs, which is in preparation. Besides we hope to be able to publish next autumn a general catalogue of our collection of Lilium.

The best time for sending out Lilies is in September and October. All sorts can be cultivated here in the open ground, the more delicate sorts are however cultivated in our establishment under glass.

The Lilies are always supplied (if there is no remark) in flowering bulbs. Bulbs of medium size can be supplied at 3/4 of the quoted prices.

Lilium Sarana see: under Fritillaria camtschatica.

GLADIOLUS.

In September a general descriptive list of this genus will be published, containing the complete collection of this genus.

We cultivate all the different sorts of Gladiolus with good success in the open ground, they are planted in autumn, with exception of *floribundus* and *gandavensis* and their varieties which are planted in spring. Time of expedition from 1^o September till 1^o December, for the *gandavensis* and other sorts, planted in spring, from 1^o September till 1^o April.

HYBRIDS OF GANDAVENSIS.

Last season orders for this division of Gladiolus have been so numerous, in consequence of the difficulty of getting bulbs from France, that we are nearly sold out for the moment and are obliged to give our collection a period of rest, we therefore shall not be able to supply these varieties with very few exceptions before November, at that period we hope to be able to supply again the complete assortment, which will be quoted in the special Gladiolus list, to be published in September next.

AMARYLLIS.

(*Hippeastrum*.)

Our collection contains every good variety, and is one of the most complete to be found. All different sorts of *Hippeastrum* (*Amaryllis*), require during their development a good bottom-heat upon a bed of tan. During winter an entire cessation of growth should be allowed them, and on the mean time they should be store away in the pots, upon a dry warm shelf or shed. Expedition from 1 August till 1 April. For sorts not mentioned here see: *Belladonna*, *Brunsvigia*, *Buphone*, *Cyrtanthus*, *Crinum*, *Habranthus*, *Lycoris*, *Nerine*, *Paneratium*, *Phycella*, *Pyrolirion*, *Sternbergia*, *Sprekelia*, *Strumaria*, *Valloia*, *Zephyranthus*.

PAEONIA.

All sorts of Paeonia are cultivated in the open border, the *arborea* or *Montan* are covered in our climate with a few leaves during the winter. Time of expedition August till March, for *arborea* the whole year in pots. The Paeonia are sent out in strong but divided plants, the prices of undivided plants are doubled or sometimes tripled.

For prices of *Paeonies*, we do refer to the **Catalogue of Paeonies for amateurs** (n^o. 9), which will be sent on application and on the prices of which a discount of 20 per hundred is allowed to the trade.

In the last years we have completed our collection of Paeonies with the utmost care with all the novelties know at this moment, a special catalogue of novelties will contain their names and prices, these vary from 1.8 to 15 *sh.*

Paeonia arborea (Montan).

New collection Krelage.

These sorts sent out by our establishment some years ago, are supplied in plants on their own roots, not grafted.

These names are to be found in the Cat. n^o. 56 of 1870-1871.

Miscellaneous bulbous and tuberculous plants.

The following list of miscellaneous bulbous and tuberculous plants, although very large, does not contain however our complete collection of these plants; the retail catalogue particularly destined to this rubric of plants will contain a more complete list of them and will be published as soon as possible. The new and rare kinds will be found in the catalogue of novelties which is in preparation.
